## Rejuvenation

Life  
CLINIC

# Why is my hair thinning or falling out?

Hair conditions including hair thinning or hair-loss (or alopecia) can be caused by any number of factors including:

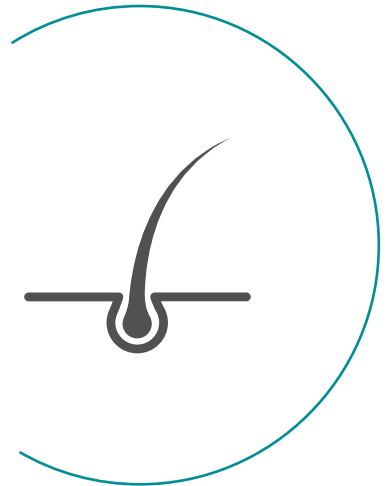

Genetics

Hormonal imbalances

Illnesses or diseases

Lifestyle factors  
e.g. chronic stress

Environmental factors  
e.g. chemical exposure

## Life Clinic Approach

Life Clinic provides a range of hair rejuvenation treatment plans depending on your primary cause of hair loss including:

- Specialised Testings
- Scalp Peel Treatment
- Growth Factor Therapies
- Nutritional Supplementation
- Hair Growth Products

## Specialised Testings

### Hair Analysis

Understand your hair condition and growth cycle through microscopic analysis of your hair follicles and scalp.

### Nutritional Testing

Understand how your micronutrient levels (e.g. B vitamins, Zinc) are affecting the healthiness and growth of your hair.

### Hormone Testing

Analyse your hormone function and levels (e.g. cortisol, sex hormones) that affect the quality and healthiness of your hair.

### Heavy Metal Testing

Determine what heavy metals (e.g. mercury, lead) are affecting the quality and function of your hair.

## Scalp Peel Treatment

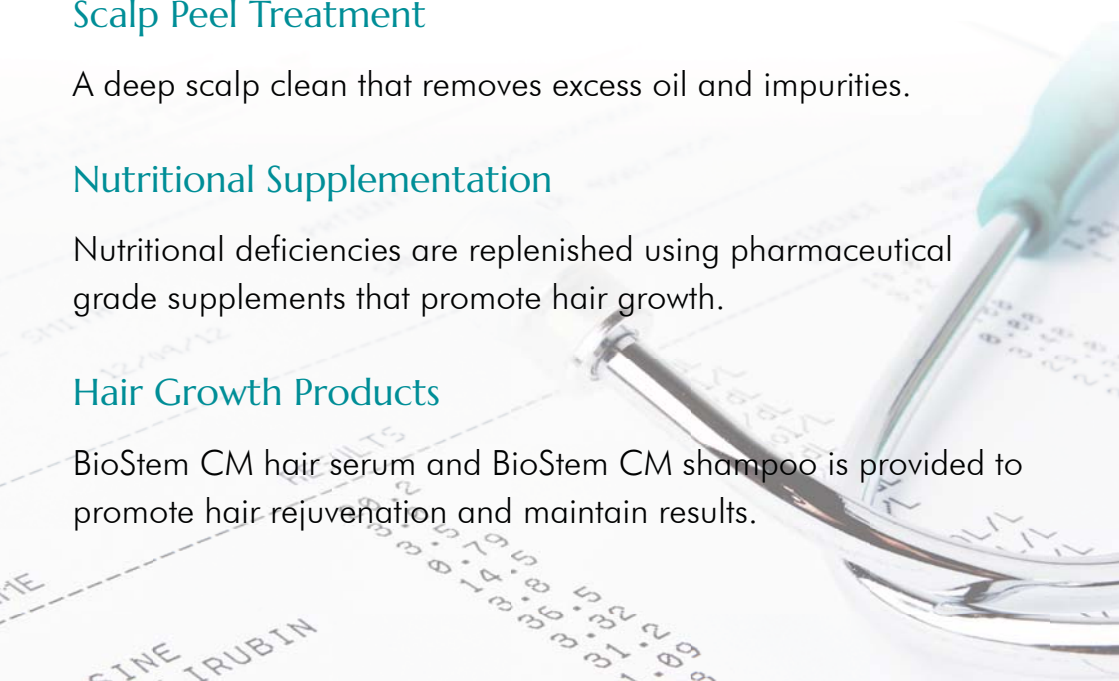

A deep scalp clean that removes excess oil and impurities.

## Nutritional Supplementation

Nutritional deficiencies are replenished using pharmaceutical grade supplements that promote hair growth.

## Hair Growth Products

BioStem CM hair serum and BioStem CM shampoo is provided to promote hair rejuvenation and maintain results.

## Growth Factor Therapies

### SGC® (Self Growth factors Crystallization)

The SGC® is an advanced aesthetic treatment that is derived from your own Growth Factors – or protein molecules – to rejuvenate aged skin and hair-loss.

Growth Factors are versatile and have a wide range of functions that regulate division, survival, repair, and growth of cells.

#### Benefits

- Supports and sustains hair growth
- Thickens hair
- Improves hair healthiness and texture

### BioStem CM Cell Signal Therapy

Based on an innovative medical technology, the BioStem CM Cell Signal Therapy uses a high concentrated formula made of complex protein signals that repair and regenerate cells for hair growth.

#### Benefits

- Promotes hair growth
- Thickens hair
- Reverses greying hair
- Controls excessive oil
