

INTEGRATIVE CANCER TREATMENTS

Life
CLINIC

“Changing Medicine, Changing Lives”

Life Clinic

UNIQUE CANCER TREATMENTS

Life Clinic combines *conventional cancer therapies* with *evidenced-based complementary therapies* to offer true *integrative treatment* options for our patients.

Our approach aims to maximize the results of conventional cancer treatments while minimizing the debilitating side-effects associated with many cancer treatments.

We place the patient and their families at the center of decision-making and all treatment plans are based on the cancer type, medical history and personal preferences.

Our international team of oncologists, doctors, practitioners, and health coaches use the latest evidence-based research and the highest quality products available to deliver optimal outcomes for our patients.

SUPPORTIVE MEDICAL CANCER TREATMENTS

Life Clinic offers our patients a range of *evidenced-based complementary and alternative therapies* that are used in combination with conventional treatments like chemotherapy, radiotherapy, or surgery. These therapies include nutrition, stress management, Traditional Chinese Medicine, and IV therapies.

Our team of medical doctors and practitioners combine their knowledge to offer integrative programmes that help cancer patients achieve optimal outcomes as safely and naturally as possible.

We treat people at different stages

CANCER PREVENTION

Early cancer detection is the best form of treatment. We offer a variety of tests including simple blood tests, which can detect proteins and/or other substances produced by cancer cells in your blood.

PREPARING FOR TREATMENT

In order to fully benefit from your conventional treatments (such as chemotherapy, radiotherapy, or surgery), our medical team works with you in advance to optimise your health. This includes boosting your immunity, detoxifying your organs, improving your diet, and managing your stress.

UNDERGOING TREATMENT

If you are undergoing treatments, you may experience difficult side-effects. Our medical team works with you to minimise these side-effects while also boosting the effectiveness of your treatment.

ALTERNATIVE TREATMENTS

If you feel that conventional treatments are not right for you, or if you would like to know more about alternative treatments, our medical team can advise integrated therapies available that kill cancer cells, boost your immunity, rebuild your health, and support your well-being.

POST CANCER TREATMENTS

Once you have survived cancer, we support you to remain cancer-free. Our cancer rehabilitation programme focuses on sustained positive lifestyle changes and detoxification.

INTEGRATIVE CANCER TREATMENTS

PREVENTION

TREATMENTS

ALTERNATIVE TREATMENTS

POST CANCER

PREVENTION

CANCER EDUCATION

Our education sessions raise awareness of early screening and diagnosis that lowers your risk of cancer. We share the latest evidence-based treatments available and introduce simple ways to implement real lifestyle changes to lower your risk factors.

EARLY CANCER DETECTION

Early cancer detection leads to higher rates of successful treatments and extended healthy life. In its early stages, tumors are small and respond to treatment faster than large tumors lowering the risk of metastases.

SCREENING

Our latest screening tests detect your cancer well in advance, regardless of the type of cancer. Screening is especially important if you have a family history of cancer, work in a high risk carcinogenic environment, or engage in unhealthy behaviours like smoking.

GENETIC TESTING

When you have an inherited cancer risk, genetic testing is important and can help estimate your chance of developing cancer in your lifetime.

MEDICAL DETOXIFICATION

Our medical detoxification programme improves your overall health to fight against disease and optimises your detoxification pathways.

TREATMENTS

HYPERTHERMIA

Hyperthermia is a common cancer treatment that uses heat via radio waves to damage and kill cancer cells by disrupting its ability to grow. Healthy tissues are undamaged.

IMMUNOTHERAPIES

Immunotherapy utilises your immune system to fight cancer. We offer a wide range of cell therapies and will personalise your treatment options according to your diagnosis and treatment plan.

NUTRITION

We provide cancer fighting nutritional plans that strengthen the body and supports immune function. We use nutrition to target the causes of cancer e.g. hormonal imbalances and toxicities.

SUPPLEMENTS AND HERBS

Supplements and herbal compounds are an effective complementary cancer treatment. They ease side effects of chemotherapy and radiation, boost immunity, and inhibit the growth of cancer cells.

IV THERAPIES

We offer a range of IV treatments that boosts the immune system, detoxifies the body, and actively attacks cancer cells. These include:

High dose Vitamin C

This treatment has shown to limit cancer growth, improve immunity, and lessen side-effects of chemotherapy.

Myers Cocktail

Containing a range of B vitamins, magnesium and zinc this treatment supports immune function while also improving overall mood.

Ozone

Ozone therapy exposes cancer cells to oxygen, inhibiting function leading to cancer cell death.

Chelation

Chelation removes toxins from the body boosting our immunity and improving our body's ability to remove toxic heavy metals.

COMPLEMENTARY AND ALTERNATIVE TREATMENTS

TRADITIONAL CHINESE MEDICINE (TCM)

TCM prevents and treats illness by targeting and restoring imbalances holistically. It eases side-effects and boosts mood.

NATUROPATHIC MEDICINE

Naturopathy uses a holistic approach to facilitate your natural ability to heal, restore, and optimise health. It focuses to identify the underlying cause of illness and facilitate healthy lifestyle changes.

HERBS

Herbs are an evidenced-based treatment that contain active extracts that boost immunity and target cancer cells inhibiting their growth.

ACUPUNCTURE

Acupuncture has been used for thousands of years to treat various illnesses including cancer. It reopens blocked pathways in the body and reduces the side-effects of nausea and pain.

LYMPHATIC DRAINAGE

The lymphatic system is an important part of the immune system that eliminates waste and toxins. When we fall ill, the lymphatic system can become sluggish or blocked. Lymphatic drainage massage encourages the removal of toxins and also improves mood and relaxation.

COLONICS

This treatment removes accumulated waste and toxins from the colon and improves overall health.

SUPPLEMENTS

Supplements can ease side-effects of conventional treatments and inhibit the growth of cancer cells.

ENZYME THERAPY

Enzyme therapy is an evidence-based cancer treatment that has shown to inhibit the growth of cancer cells, boost immunity, and improve detoxification.

MEDICAL DETOXIFICATION

Used as a treatment in the prevention, treatment and rehabilitation of cancer, medical detoxification removes excess toxins and supports immune function according to your health condition.

POST CANCER TREATMENTS

SCREENING AND EARLY DETECTION

Our latest screening and early detection tests gives you peace of mind and ensures that if cancer recurrence occurs, it is diagnosed and treated early.

NUTRITION

We provide personalised nutrition education, cancer-free meal plans, and nutritional supplements to minimise the risk of cancer recurrence.

REHABILITATION AND EXERCISE

Improving cardiovascular and muscle strength is important to remain cancer-free. Our in-house experts will tailor an exercise programme that supports your goals and condition.

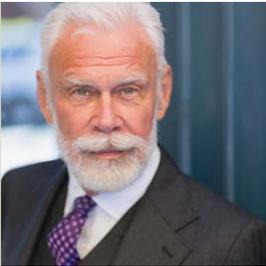

DOCTORS & PRACTITIONERS

Dr. Joseph Brenner - M.D. Oncologist
Integrative Oncologist

A cancer survivor and oncologist for over 35 years, Dr. Brenner trained at the leading Memorial Sloan Kettering in New York. He is a world leader in the use of hyperthermia and an expert in cancer nutrition.

Prof. Daniel Weber - PhD, MSc
Integrative TCM Cancer Specialist

A pioneer in complementary medicine and integrative oncology since 1977, Prof. Weber is a committed clinician, the vice-chair of the oncology section of the World Federation of Chinese Medicine Societies and editor of the Journal of Chinese Integrative Medicine.

Dr. Stephen Chan - MRCP (UK), DRCOG, DFFP,
MB BS (Lond), BSc
Chief Medical Officer of Life Clinic

With more than 20 years' experience, Dr. Chan has a holistic, integrative, and functional medicine approach towards empowering people to not just treat illness when it occurs, but to prevent illness in the first place.

Dr. Graham Player - PhD
Integrative Cancer Coach

In clinical practice for over 30 years, Dr. Player is a Chinese Medicine practitioner and cancer coach who has published extensive papers on integrative oncology. Dr. Player guides patients through their healing journey.

**Miles Price - M.Sc. Holistic Nutrition, Dip. Funct Med, BANT (UK), IFM Registered
Functional Medicine Practitioner
Clinical Nutritionist**

With over 10 years' experience, Miles uses a root cause and nutritional approach to diseases and dysfunction including cancer. He utilises diagnostic testing, supplements, and diet planning to improve patient health.

**Dr. Philip Choy - D.N.M., N.D., D.O. ANMCB
Naturopathic Physician**

With 10 years' experience, Dr. Choy integrates his extensive knowledge towards improving the health of his cancer patients using natural, holistic, and evidence-based treatments including nutritional herbs and supplements, aromatic essential oils, and homeopathic remedies.

**Master Stanley Cheung - MA TCM (China),
Registered TCM Practitioner (HK)
Traditional Chinese Medicine (TCM) Practitioner**

Master Stanley has been practicing TCM for more than 20 years. He believes a balanced state of the mind and body is key to optimal health. He uses TCM to heal a wide range of conditions from recurrent infections to cancers and emotional issues.

**Winnie Niou - BSc, Registered Dietitian
Clinical Dietitian**

Winnie has over 15 years' experience practiced as a clinical dietitian. She provides nutrition advice and meal planning ideas in the area of kids health, obesity, cardiovascular health, cancer, and chronic diseases. She supports and motivates her clients to adopt an active and healthy eating lifestyle.

CASE STUDY ONE

MRS. V WITH LIVER CANCER

Background

- Mrs. V was diagnosed with Hepato-Cellular Carcinoma (or primary liver tumour) in 1993. In 1998, she had multiple hepatic and extra-hepatic metastasis
- All hospital related treatments had failed and she was sent home with no further treatment options

Treatment

Mrs. V was given a combination of treatments including:

- Hyperthermia
- Intravenous vitamins
- Oral supplements

Results

- Dramatic response was achieved where alpha-fetoprotein (AFP) levels dropped from 1,000 to 27
- CT scans showed gradual shrinkage of the masses where the most recent scan showed no masses
- Mrs. V's tumour had completely disappeared and she survived 10 years without the cancer disease

CASE STUDY TWO

MR. Y WITH CANCERS OF PANCREAS, LIVER, AND LUNGS

Background

- In 2010 Mr. Y was diagnosed with cancer of the pancreas and developed liver and lungs metastases
- He was expected to live less than 6 months, unable to do surgery, and had no treatment options

Treatment

Mr. Y was given a combination of treatments including:

- Chemotherapy with hyperthermia to abdomen and lungs
- High dose vitamins
- Oral supplements

Results

- By August 2012, there was no presence of cancer in the pancreas, liver, and lungs
- Mr. Y had surgery to remove the pancreas and no tumour cells were found
- Mr. Y lived more than 3 years in a good health state

CASE STUDY THREE

MRS. K WITH BREAST CANCER

Background

- In 2010, Mrs. K was diagnosed with breast cancer. Her type of cancer was incurable so she chose to have a mastectomy
- In 2013, the cancer had returned and spread to other parts of the body

Treatment

Mrs. K was given a combination of treatments including:

- External, superficial, and deep hyperthermia
- Hormone therapy
- Intravenous vitamins
- Oral supplements

Results

- 3 months after treatment, Mrs. K was in complete remission
- As of today, her tumor markers are normal and she is cancer-free

CASE STUDY FOUR

LIFE CLINIC'S DR. BRENNER WITH PROSTATE CANCER

Background

- In Jan 2001, Dr. Brenner was diagnosed with Inoperable Adenocarcinoma of the Prostate with a PSA of 20

Treatment

Dr Brenner was given a 4-month combination of treatments including:

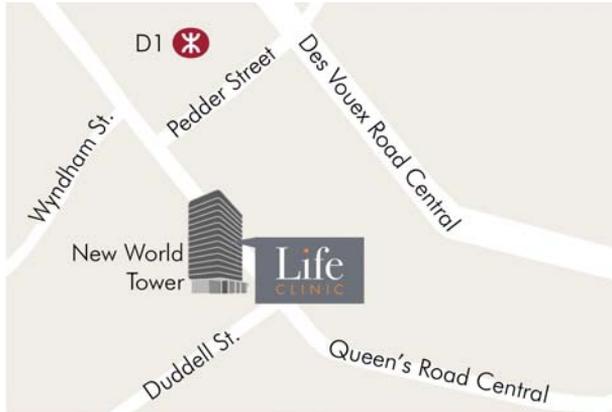

- Advanced radiation therapy
- Hyperthermia
- Hormone therapy
- Intravenous vitamins
- Oral supplements

Results

- As of today, Dr. Brenner is cancer-free with a PSA of 0
